

# AXD-69C DIGITAL TV AMPLIFIER UHF TV CHANNELS CH 14-CH 69

This digital TV amplifier is an excellent broadcast solution for small TV stations, monitoring or experiments. It is fully synthesized and broadband for UHF channels 14-69. Power output is over 2000 mW / 50 ohms. Required power input is 0 dBm that makes it a great solution for the most digital exciters available on the market.

RF Technical Specifications	
VISION SPECIFICATIONS	
RF OUTPUT	2 W
OUTPUT IMPEDANCE:	50 ohm
Antenna Connector:	BNC /N F
Return loss	< 1.25
Input power	0 dBm
Frequency:	471-868 MHz
