

CMDX-6 WIRELESS CMOS CAMERA 2.4 GHz

This is an excellent small camera with a built-in Professional transmitter SDX-1 for 2.4 GHz FM band available in frequencies: 2410 MHz, 2433 MHz, 2452 MHz and 2481 MHz. This special small camera can be tuned to any frequency from 2400-2473 MHz. The range of this unit is limited but can be increased using special antennas with preamplifiers on the receiving end.

Technical Specifications	
Size:	0.7" X 0.8" X 0.7"
Current consumption	45 mA/ 9V
Transmitting power	10 mW
Camera resolution	330 lines
Power supply	9V
Range	30-300 ft
Polarity protected	Pinhole lens
Frequencies:	2400 MHz- 2473 MHz Tunable
