

# XLS- 2100/HP 8 CHANNELS MICROWAVE LINK FOR 2.0 - 2.1 GHz

## **Recommended for Government agencies**

Extreme range: 20 W transmitter with 8 channel receiver, 2 special antennas 9.5 dB gain PT-1700, Capacity: 1 video/2 audio channels. Operating frequency: synthesized. This link is Professional and it is recommended for special applications or video surveillance. It is made for long distances - up to 100 km line-of-sight. Frequency setting is internal.

#### **Export restricted**

| Technical Specifications | XLS-2100/HP Transmitter |
|--------------------------|-------------------------|
| Operating Frequency      | 2000 MHz – 2100 MHz     |
| Channels                 | 8 channels              |
| Channel Selection        | DIP- Switches           |
| DC Voltage               | 12 V                    |
| RF output power          | 20 W                    |
| Minimum required voltage | 12.0 V                  |
| Battery Power            | 14 V                    |
| Frequency stability      | 0.005%                  |
| Video distortion         | 1%                      |
| Maximum Range            | App. 100 miles          |
| Video format             | NSCT, PAL               |
| Current Consumption      | 9.5 A                   |
| Antenna                  | Directional             |
| Impedance                | 50 ohms                 |
| Video connector          | BNC                     |
| Video level              | 1 V                     |
| Video impedance          | 75 ohms                 |
| Audio frequency response | 20 Hz – 20 kHz          |
| Audio input              | 300 mV                  |
| Audio carrier frequency  | 6 MHz                   |
| Temperature Range        | -40+75 °C               |
| Dimensions               | 7.5" x 11" x 3.5"       |
| Weight                   | 16 lb                   |
| Modulation               | WFM                     |

| Technical Specifications | XLS-2100/PR Receiver |
|--------------------------|----------------------|
| Operating Frequency      | 2000 MHz – 2100 MHz  |
| Channels                 | 8                    |
| Channel Selection        | DIP- Switches        |
| DC Voltage               | 12 V                 |
| Sensitivity              | -86 dBm              |
| Minimum required voltage | 12 V -24 V           |
| Battery Power            | 12.6 V- 24 V         |
| IF frequency             | 480 MHz              |
| Video distortion         | 2%                   |
| IF bandwidth             | 18 MHz               |
| Gain flatness            | 0.6 dB               |
| Noise                    | < 2 dB               |
| Antenna                  | Directional          |
| Impedance                | 50 ohms              |
| Video connector          | BNC                  |
| Video level              | 1 V                  |
| Video impedance          | 75 ohms              |
| Image rejection          | N/A                  |
| Audio input              | 300 mV               |
| Audio output             | 300 mV               |
| Temperature Range        | -40 + 75 °C          |
| Dimensions               | 7.5" x 11" x 3.5"    |
| Weight                   | 6 lb                 |
| Modulation               | WFM                  |
| Antenna connector        | SMA                  |

#### **Powerup**

At powerup, the unit will retrieve the last used channel, program the PLL with this channel, and display the channel by blinking the LED the same number as the channel number.

## **Displaying Current Channel**

Push button is located on the top of the unit. To display the current channel, press the pushbutton once and release. The current channel will blink. After approx. 5 seconds, the current channel will again blink.

# **Changing to a New Channel**

To change to a new channel, press the pushbutton once and release. The current channel will blink. Press and release the pushbutton again **before** 5 seconds has elapsed and the channel will increment by 1 and the LED will blink the new channel. Repeat this step until the desired channel is reached, waiting for the blinking to stop each time before pressing the button again. **Once your desired channel is reached, wait 5 seconds until the LED again blinks your desired channel. Your new channel is now saved in memory.** 

#### Warning

Our microwave links are built in weatherproof boxes, but they are not waterproof. Please make sure to protect transmitter/receiver boxes from the rain and moisture.
