

# CMS-69T

## ADJUSTABLE SMALLEST WIRELESS VIDEO CAMERA FOR TV CH UHF67-69

**This is a brand new unit - World's smallest color video camera that transmits direct to UHF TV channels: from CH-67 to channel CH-69 UHF TV band. You can choose three channels: 67, 68 and 69 UHF. It is extremely small, sophisticated unit with an amazing low power consumption.**

**The battery 9 V will last 18 hours! The picture is great, stable and full color with over 330 lines of resolution! You don't need any special receiver - any TV set or VCR tuned to UHF CH 67-69 UHF can get the picture. It is excellent for experiments, surveillance etc...**
