

This little color camera with the World's smallest video transmitter for CH 59 CABLE UHF is the smallest high power unit on the market designed for experiments or video-surveillance. This pin hole color camera will send the picture direct to your TV set or VCR tuned to CH 59 UHF CABLE, you don't need any special receiver!

The camera has 330 lines of resolution. Battery 9 V Duracell will last over 8 Hours!! The unit measures only 0.7" X 0.7" X 0.8". You can pick-up the signal using any kind of TV set tuned at CH 59 Cable, or UHF band- just below CH14 on the most handheld TV's. It is great for your cottage, beach house or even car or any kind of video-surveillance.

**Designed for experiments or video-surveillance**

Technical Specifications	
Operating Frequency:	433.92 MHz ( CH 59 CABLE)
Battery operated:	7-12 V
Power output:	80 mW / 12 V
Size:	0.7"x0.7"x0.8"
Range:	up to 1000 ft LOS
Built-in antenna	Yes
High quality color picture	Yes
Resolution	330 lines
Current consumption:	56 mA/ 9 V; 65 mA/12V
Weatherproof	Yes
Crystal controlled	Yes
High durable	Yes
Reverse polarity protected	Yes
Temperature range	-20+60 *C
Audio	No
