# S-1700/10 COMPLETE RACING UHF WIRELESS SYSTEM 1700 MHz FM

---

COMPLETE RACING  
WIRELESS SYSTEM

1700 MHz FM

1.7 GHz complete wireless TV system S-1700 is an excellent solution for car racing. It comes with a high power video transmitter 10 W, receiver VRX-1700, dipole antenna and a yagi antenna 8 dB. This system is excellent to send a broadcast quality video signal over 25 miles. The range in open area is much greater. This system comes in 8 selectable channels.

Receiver	Technical Specifications
Power supply:	DC 12 V
Sensitivity:	-89 dBm
Frequency range:	1700-1850 MHz
Number of Channels:	8
Antenna connector:	SMA
Demodulation:	WFM
Audio outputs:	300 mV/10 Kohm
Video output:	1 V
Video impedance:	75 ohms
Current consumption: :	400 mA

Transmitter	Technical Specifications
Power supply:	DC 12 V
RF power:	10 W
Frequency range:	1700-1850 MHz
Number of Channels:	8
Antenna connector:	SMA
Modulation:	WFM
Audio input:	300 mV/10 Kohm
Video input:	1 V
Video impedance:	75 ohms
Video distortion:	2%
Preemphasis filter:	Built-in
Current consumption: :	4500 mA
